

1. [Top to Bottom] Step-by-step procedure for solving a problem
2. [Left to Right] Number system using 0 and 1
3. [Left to Right] Converts code into executable form
4. [Top to Bottom] Organized collection of data
5. [Left to Right] Secures data by converting it to code
6. [Left to Right] Network security system
7. [Left to Right] Version control platform
8. [Top to Bottom] Fixed-length value from data

9. [Left to Right] Point of interaction between components
10. [Left to Right] Programming language
11. [Top to Bottom] Core part of an OS
12. [Left to Right] Repeating code structure
13. [Left to Right] Computing device or model
14. [Left to Right] Unit in a data structure or network
15. [Top to Bottom] Instance of a class in OOP
16. [Top to Bottom] Rules for communication in a network
17. [Top to Bottom] Request for data from a database
18. [Top to Bottom] Device directing network traffic
19. [Top to Bottom] Programs and operating systems
20. [Top to Bottom] Smallest sequence of programmed instructions
21. [Top to Bottom] Person using a system
22. [Left to Right] Named storage for data
23. [Left to Right] Global system of interconnected documents
24. [Top to Bottom] Markup language for structured data
25. [Top to Bottom] Application Programming Interface
26. [Top to Bottom] True/false logical value
27. [Left to Right] Temporary storage for fast access
28. [Top to Bottom] Find and fix errors in code
29. [Left to Right] Common network protocol
30. [Left to Right] Reusable block of code
31. [Top to Bottom] Version control system
32. [Top to Bottom] Key-value data structure
33. [Left to Right] Integrated Development Environment
34. [Left to Right] Data interchange format
35. [Top to Bottom] Reasoning process in computation
36. [Left to Right] Interconnected computers or devices
37. [Top to Bottom] Operation code for CPU instructions
38. [Left to Right] Unit of data sent over network
39. [Left to Right] First-in-first-out data structure
40. [Left to Right] Function calling itself
41. [Top to Bottom] Last-in-first-out data structure
42. [Left to Right] Unit of data in parsing
43. [Left to Right] Character encoding standard
44. [Left to Right] Iteration of software
45. [Top to Bottom] Loop structure with condition
46. [Top to Bottom] Exclusive logical operation
47. [Top to Bottom] Produce a value from a generator
48. [Top to Bottom] Compressed archive format
49. [Left to Right] Remote computing resource
50. [Left to Right] Set of instructions executed by a program
